MCFT Modular Curved Frame Technology

Exterior Signs

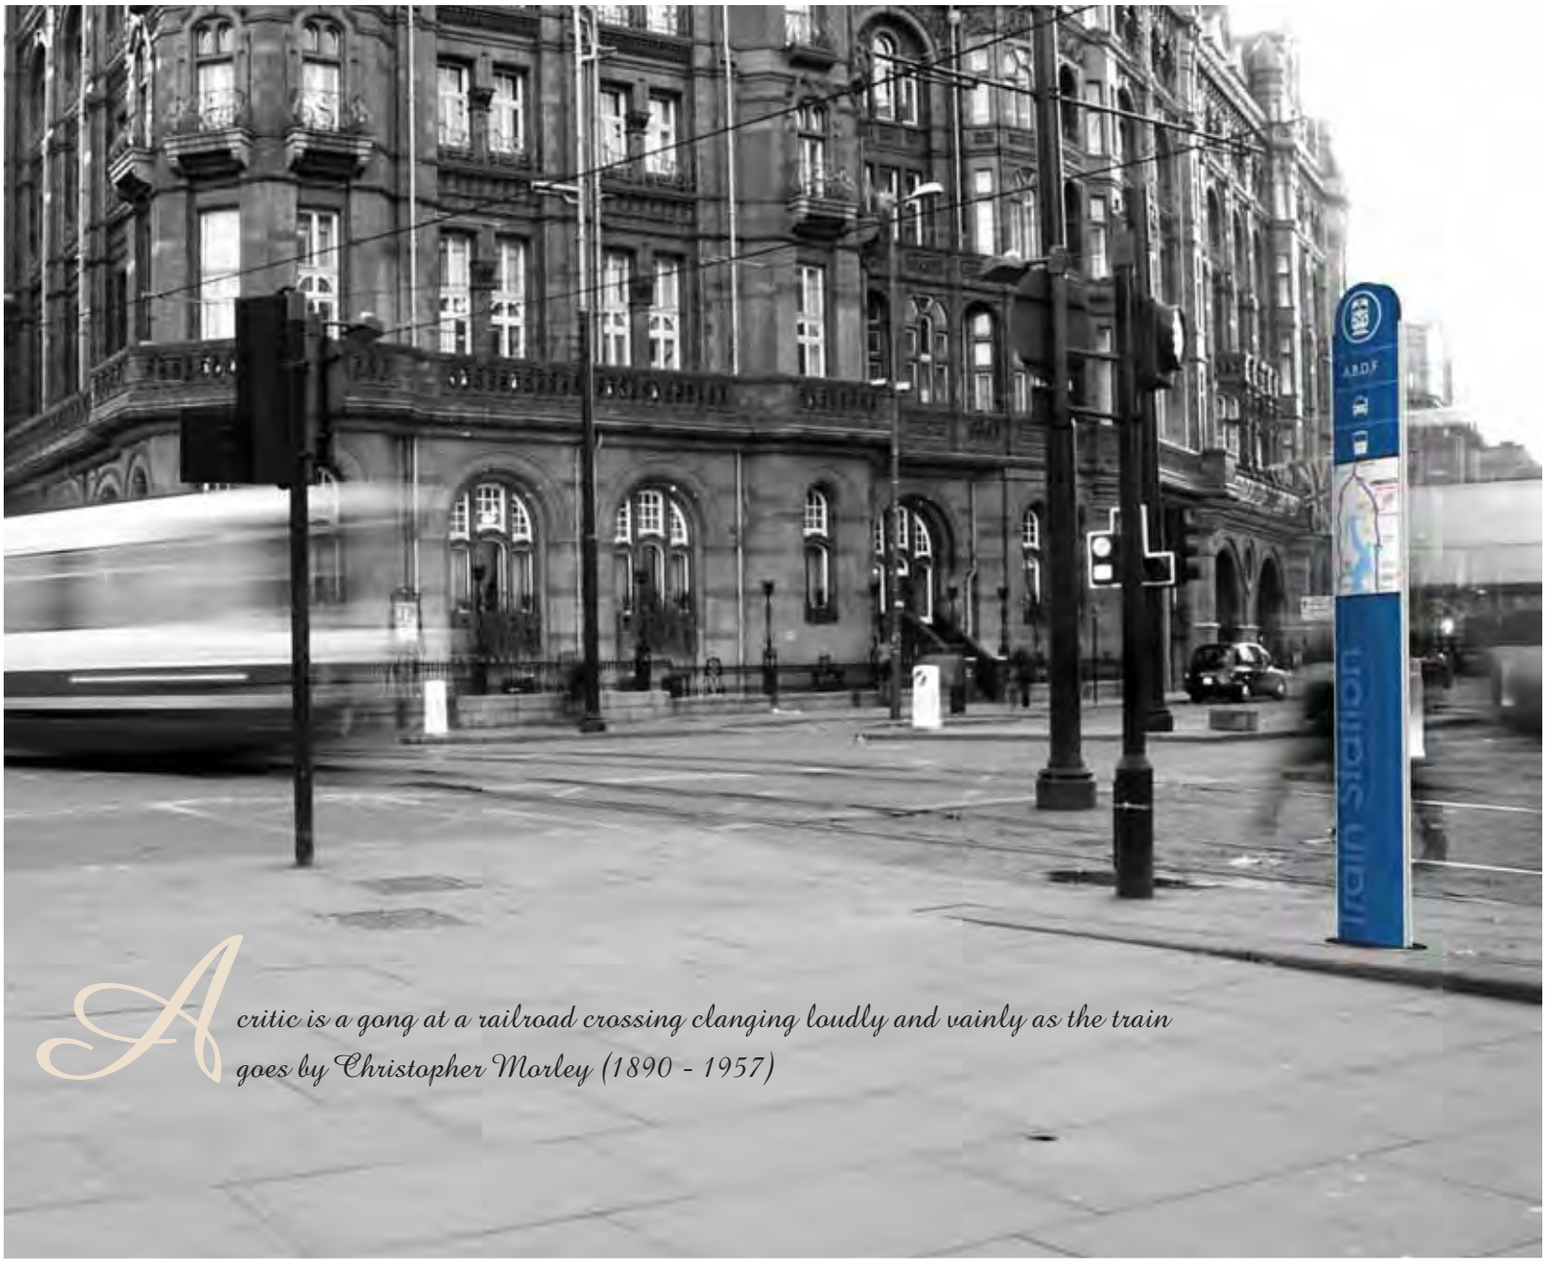
Vista System signs are the result of innovative design combined with unsurpassed technology. Each sign is designed to deliver peace of mind. Vista's Modular Curved Frame Technology (MCFT) is the answer for projects that require the look and feel of custom made contemporarily designed signs without the high cost and hassle. coupled with the high availability of service through thousands of sign professionals worldwide make Vista a natural choice for public projects.

DSV600/2300

■ A wide range of sizes can be fabricated by expanding the extrusions to fit the standard bases and end caps.

Double Sided Pylons

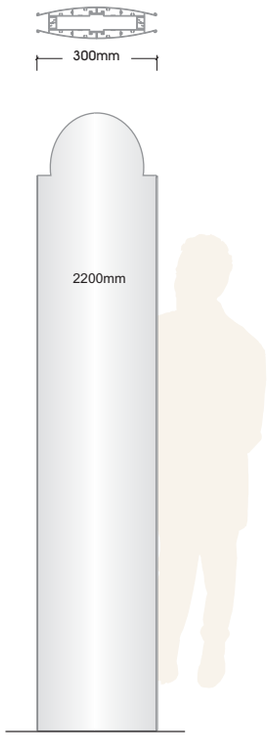
DSV600/2300
Frame size: V600/2300mm
Insert size: 597.5/2300mm



A critic is a gong at a railroad crossing clanging loudly and vainly as the train goes by Christopher Morley (1890 - 1957)

DSV300/2200

■ Vista system offers a range of bases and end caps that utilise the built in screw bosses allowing all sign holders to be assembled, simply using only a screwdriver.



Double Sided Pylons

DSV300/2200
Frame size: 300/2200mm
Insert size: 297/2200mm

Vista System sign offers a modular design, clear, precise and innovative, simple and functional.

Lobby

What do you expect from your sign supplier? Choosing a sign system for your project is a vital decision.
Flexibility and choice is highly important.

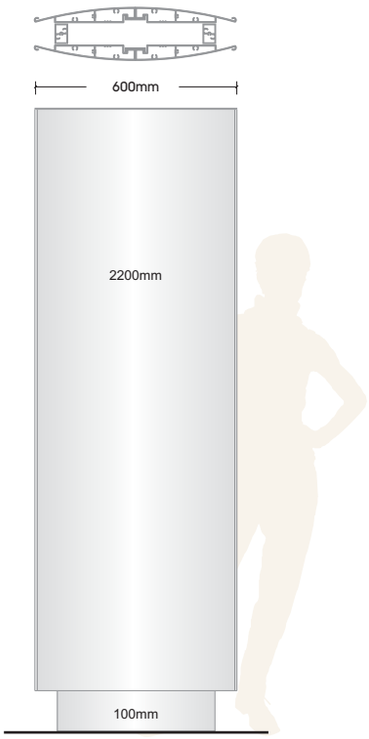
A good sign system is one that is well accepted by leading sign professionals anywhere near you, that can be easily installed, updated, upgraded and maintained quickly even by in-house staff. Vista Railway Line offers you that and much more.

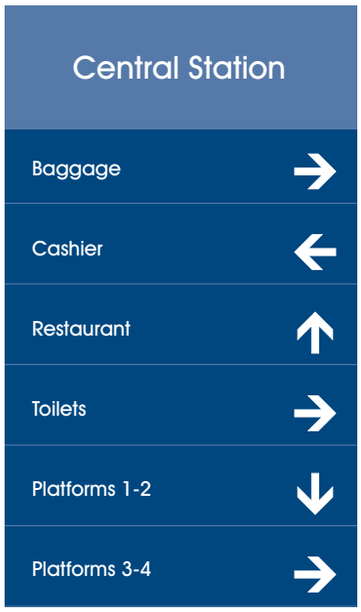
If you board the wrong train, it's no use running along the corridor in the other direction. - Dietrich Bonhoeffer

DSV600/2300

Lobby

■ This feature of the system is used to create freestanding convex, double-sided signs to be used with standard sign substrates, without interior illumination.



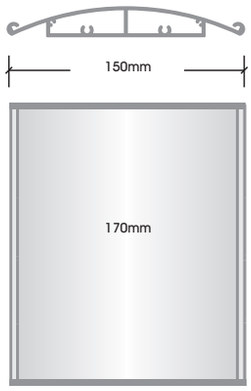


Double Sided Pylons

DSV600/2300
Frame size: 600/2300mm
Insert size: 597.5/2300mm

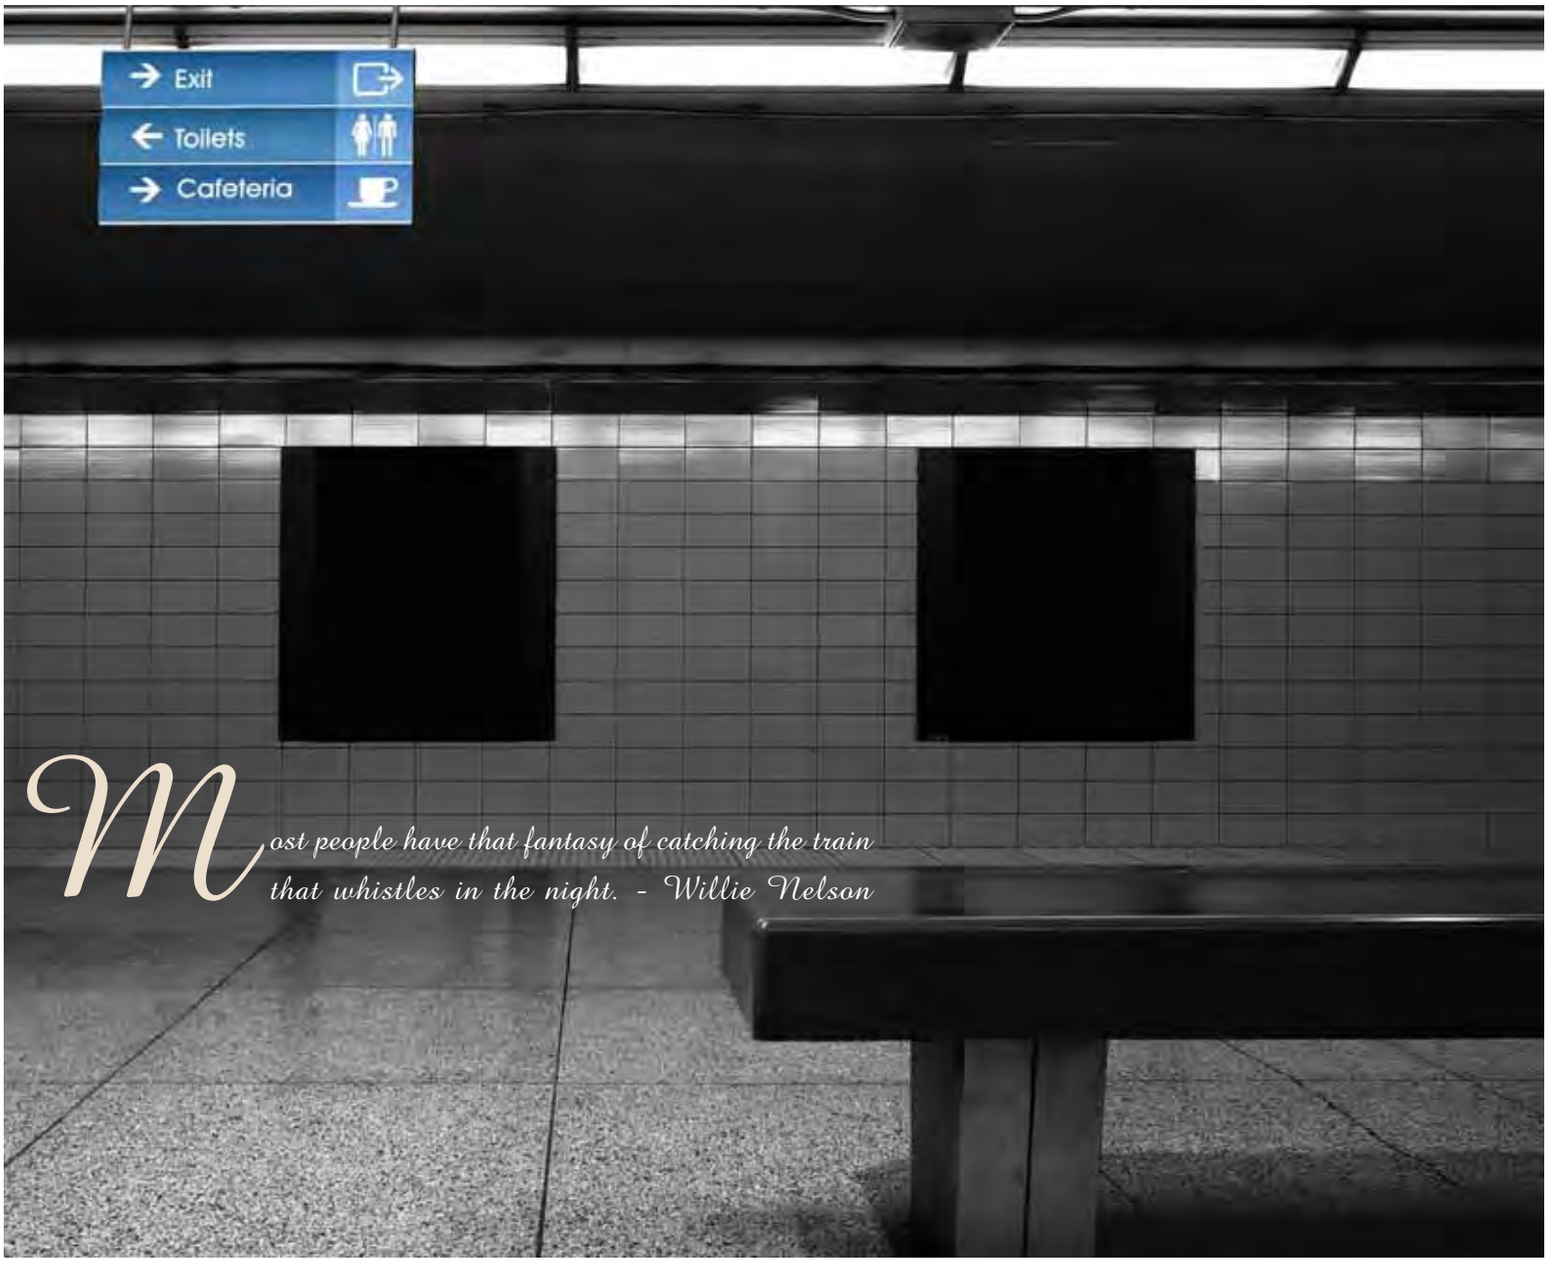
V150/170

■ Create wall-mounted signs with the Vista frame extrusions using any flat, flexible substrate to create a curved-face sign.



Wall Frames - Portrait

V150/170
Frame size: 150/170mm
Insert size: 147/170mm



Most people have that fantasy of catching the train that whistles in the night. - Willie Nelson

Directional signs and information is paramount in today's bustling world of rail transportation.

Interior Signs

Vista offers a new concept for the sign industry that was developed by sign professionals with the goal of filling a gap between fabricated sign and modular sign systems. MCFT (Modular Curved Frame Technology) offers the best of both worlds by providing the advantages of a modern modular system with the ability to provide a bespoke solution that meets the unique requirements of each sign project. Vista stocks the entire collection of system components for fast delivery from strategically located centeres around the world.

Tough signs for busy environments

Way finding products located within the reach of a crowd need to be tough. Vandalism frequently leads to damage to the signs. Cleaning staff, often need to use strong detergents and course cleaning materials which can also damage the signs.

Vista System utilises state-of-the-art technology to produce sign solutions made from hard anodised Aluminium and powder-coated steel. With MCFT, end caps remain firmly in place thanks to ultra strong screws. All parts are attached together using extremely strong materials without compromising the neat and modern design. Vista system is a frame system; any flat and flexible substrate can be flexed and inserted in to the frame and reinforced to keep it in place! Through simply choosing a tough sign insert, maximum protection is achieved. In rare cases where vandalism to a sign occurs the cost of replacing the insert instead of the whole sign in minimal. The replacement job is fast and easy, even by a novice.
